WOOD
COLLECTION

Prosperplast®

eco-friendly
collection

Range now contains
up to 33% of the
natural wood

Advanced technology of recycle natural waste obtained as a result of wood processing allows us to use it as a unique and original component for production of the Eco Wood collection.

eco

Hundreds of new trees – spruces and beeches have begun their new forest life. This is the result of our action, thanks to which, in agreement with the forest inspectorate in Bielsko-Biała, the tree stand of Skrzyczne has been replenished. We believe that like Prosperplast itself they will serve generations to come after us for a long time.

Production that uses plastic as raw material (such as polypropylene) is, despite what many believe, an environmentally friendly technology. When it comes to modern, efficient machines, and when water consumption in the whole process is relatively low, we can definitely say that we CARE about the ENVIRONMENT.

In fact, there are more fields in which we can implement this postulate. We are constantly expanding the product range of ECO series, produced from recycled materials. The way we pack our products (usually one packaging fits perfectly into another) allows us transporting large volumes in one vehicle. This often causes a multiple reduction of the amount of exhaust gas in the atmosphere.
