Setki nowych drzew – świerków i buków rozpoczęło nowe, leśne życie. To efekt naszej akcji, która w porozumieniu z bielskim nadleśnictwem uzupełniła drzewostan Skrzycznego. Wierzymy, że podobnie jak sam Prosperplast jeszcze długo będą służyły pokoleniom, które przyjdą po nas.

Hundreds of new trees – spruces and beeches have begun their new forest life. This is the result of our action, thanks to which, in agreement with the forest inspectorate in Bielsko-Biała, the tree stand of Skrzyczne has been replenished. We believe that like Prosperplast itself they will serve generations to come after us for a long time.

Produkcja, której surowcem jest plastik (np. pod postacią polipropylenu), to wbrew obiegowej opinii technologia przyjazna środowisku.

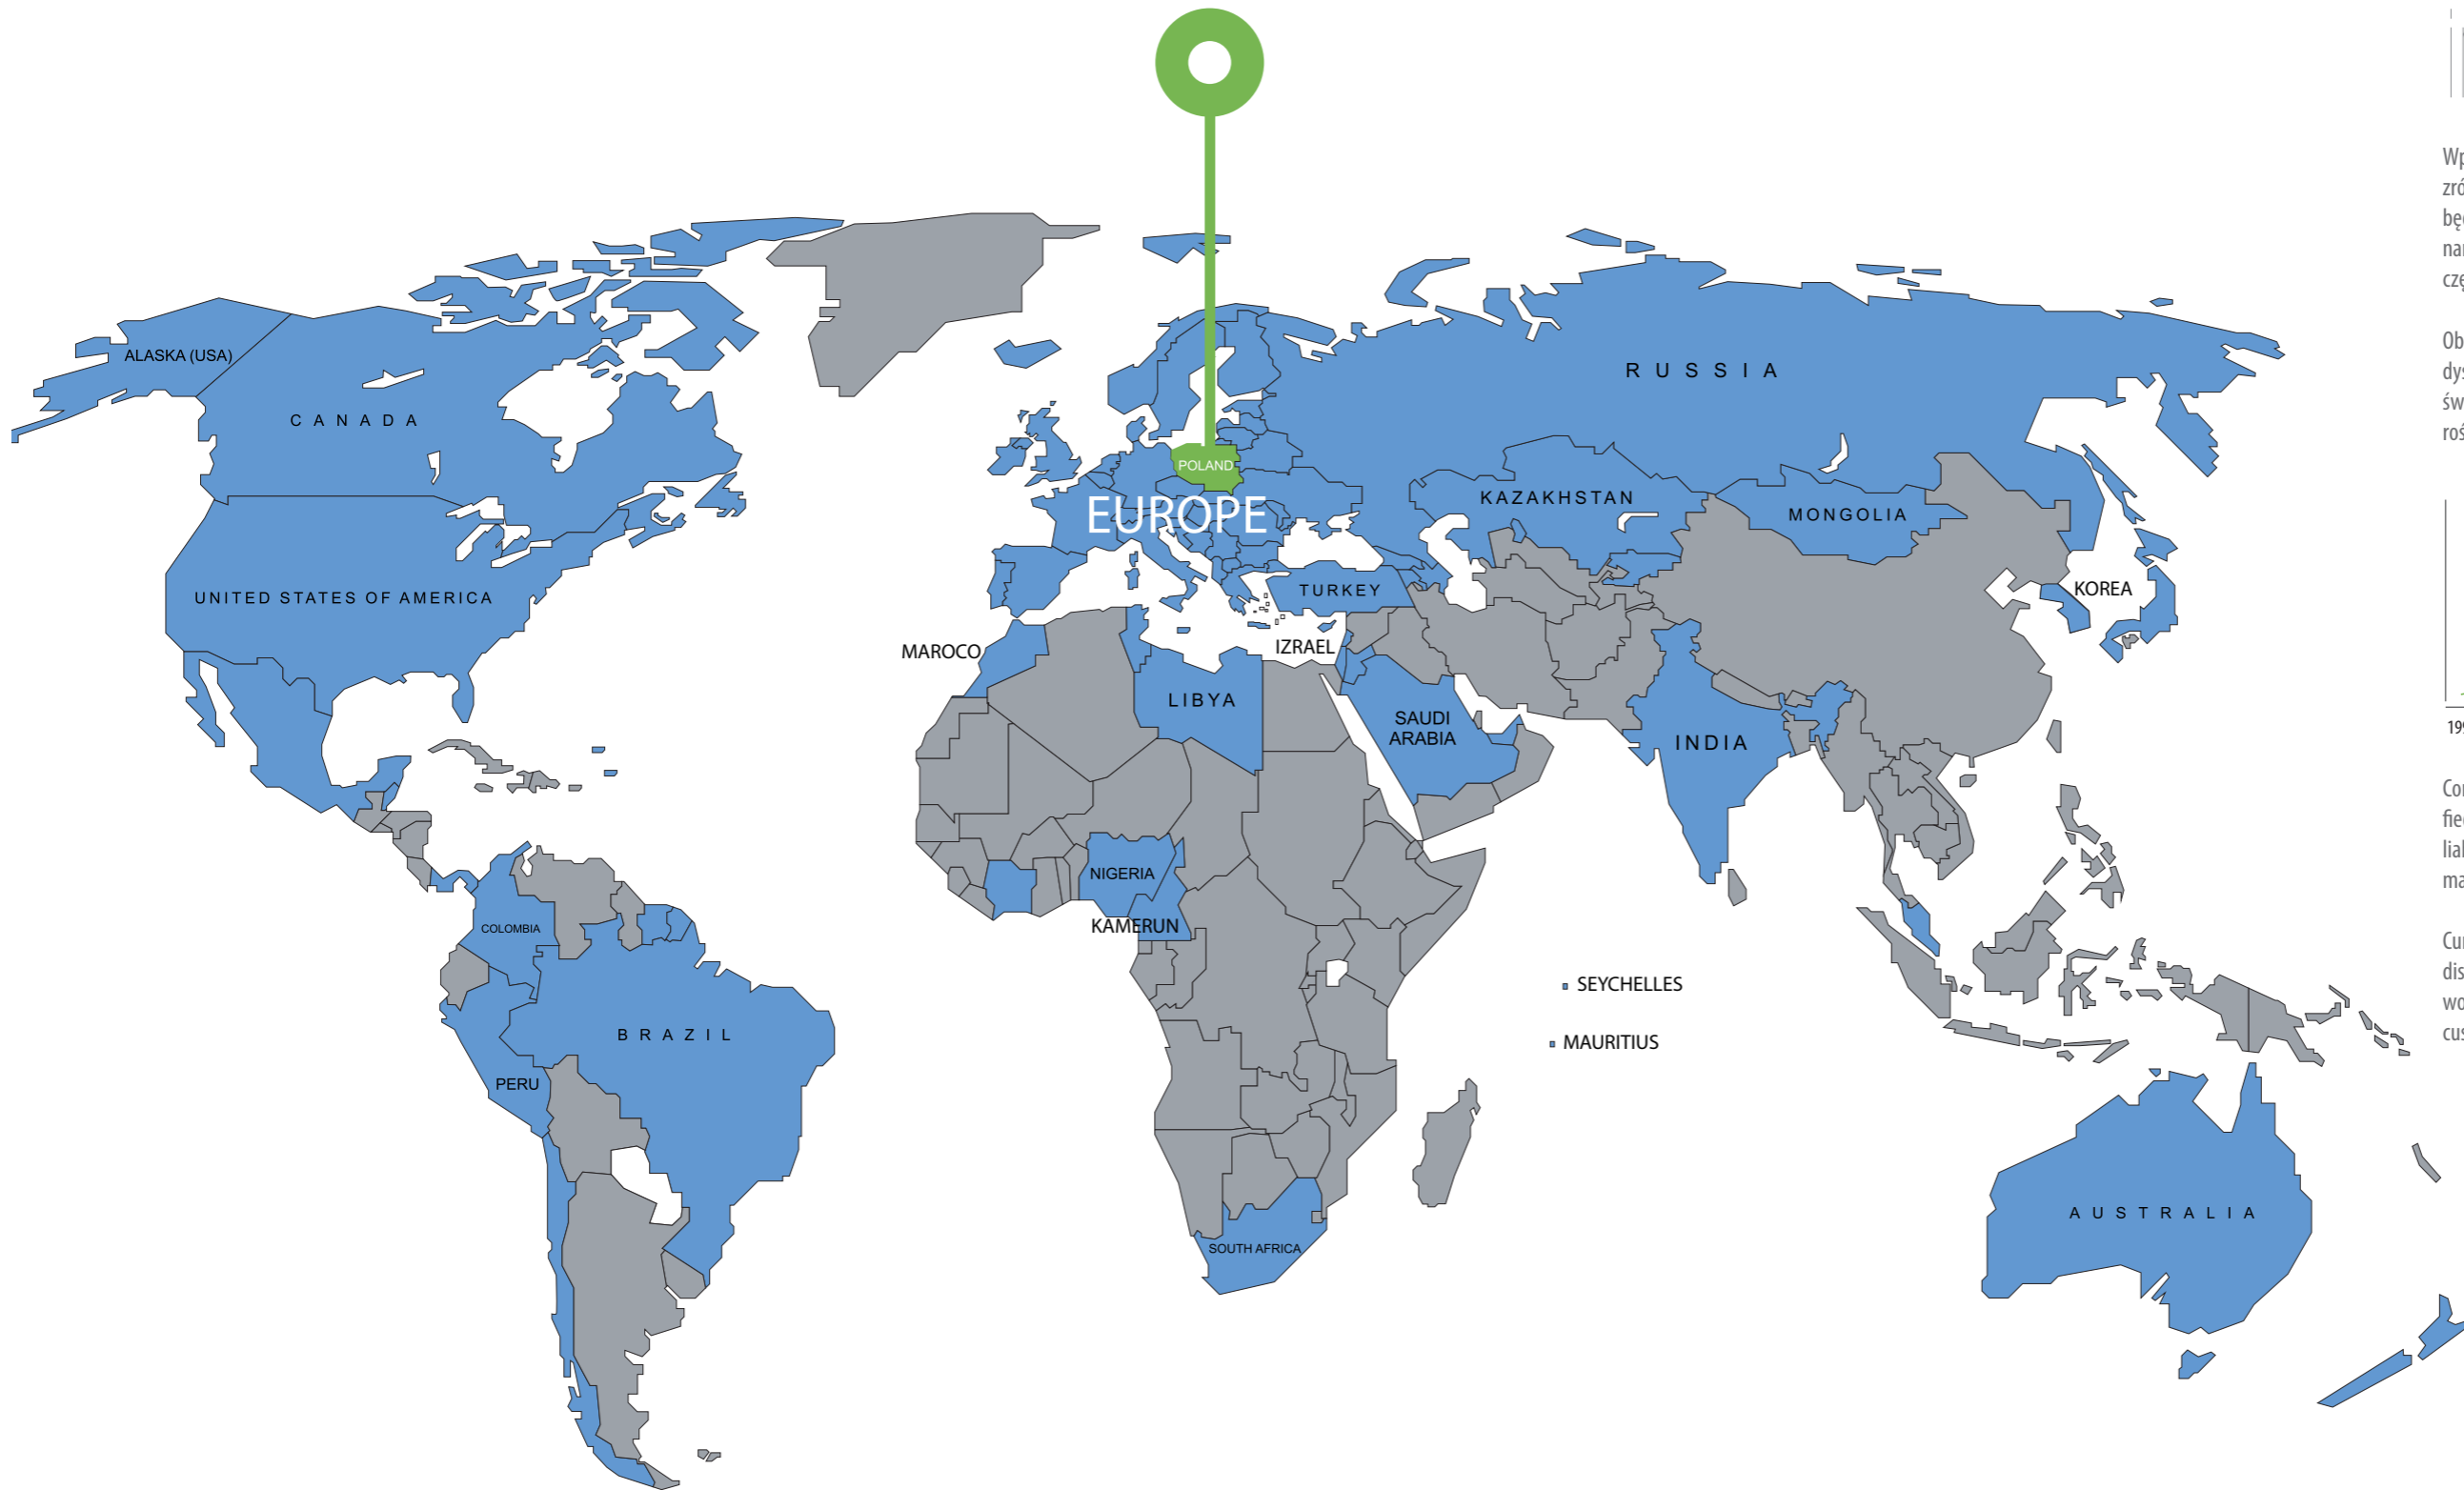

Kiedy w grę wchodzi nowoczesne, wydajne maszyny, kiedy zużycie wody jest w całym procesie produkcji stosunkowo niskie, możemy śmiało powiedzieć, że DBAMY O ŚRODOWISKO.

Jest z resztą więcej płaszczyzn, na których możemy realizować ten postulat. Stale powiększa się paleta produktów z serii ECO, wytwarzanych z surowców wtórnych. Sposób pakowania naszych produktów (UNIPACK system – jeden idealnie wchodzi w drugi) pozwala na przewożenie dużych ilości jednym samochodem. To często wielokrotnie redukuje ilość spalin w powietrzu.

Production that uses plastic as raw material (such as polypropylene) is, despite what many believe, an environmentally friendly technology. When it comes to modern, efficient machines, and when water consumption in the whole process is relatively low, we can definitely say that we CARE about the ENVIRONMENT.

In fact, there are more fields in which we can implement this postulate. We are constantly expanding the product range of ECO series, produced from recycled materials. The way we pack our products (usually one packaging fits perfectly into another) allows us transporting large volumes in one vehicle. This often causes a multiple reduction of the amount of exhaust gas in the atmosphere.
